

# Executive Management Board

## Marc Ammann

**Swiss citizen (born 1978)**

**EVP R&D and Innovation**

**Member of the Executive Management Board since 2025**

### **Key attributes:**

Marc Ammann is a proven expert in medical device development, with over 20 years of wide-ranging experience in the creation of innovative orthopaedic products and advanced engineering solutions. His technical expertise in biomedical engineering has driven notable advancements in fracture fixation technologies. His expertise encompasses osteosynthesis and reconstructive orthopaedics by developing pre-fabricated devices as well as patient specific implants and digital services.

### **Career highlights:**

Marc Ammann can look back on a successful career at Medartis since 2008, where he was Head of Engineering and responsible for all product development and, for a time, also for production technology before his promotion to Head of R&D and Innovation. During his tenure, he led the transition to advanced manufacturing technologies and spearheaded several innovative product lines for extremity orthopaedics. Previously, he worked at Stryker as Product Development Manager and Project Engineer, where he developed trauma for global markets. He began his career at Synthes as an intern, gaining foundational experience in medical device development.

### **Qualifications:**

Master of Science in Biomedical Engineering and Product Development from the Swiss Federal Institute of Technology ETH in Zurich (2000-2005).
